a Validator

Schema (1.0.0-draft.2)
every document conforms to orchid-assessment-schema

File hashes
116 file references in crni-paper-fit-step4c-b@1.0.4; sha256 match

Step order
120 supply links, 45 steps; no input before it is produced

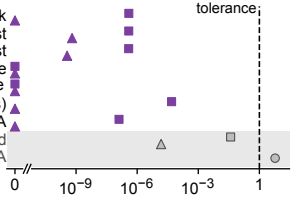

validate.py, both protocols: 0 errors

b Reproduction by step kind

Deterministic: byte-identical
695 states evaluated: e24d0853… in both
staged by sha256: every file (DGX Spark), 446 (MCP)
phase sequence: 0 and 0 of 99 compositions differ

Numerical: within tolerance

- DGX Spark 1 (aarch64), scripted
- Mac Studio (arm64), AI agent through the orchid-sage MCP
- recorded modes (Mac Studio)

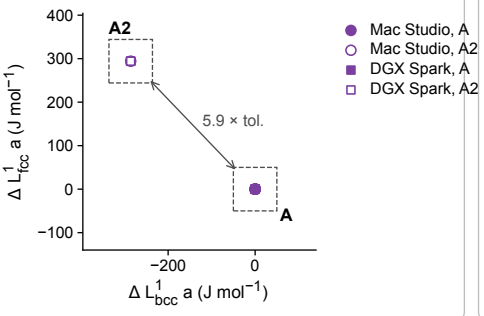

13/13 checks pass (DGX Spark); 13/13 (MCP)

Judgement: the rule and who set it

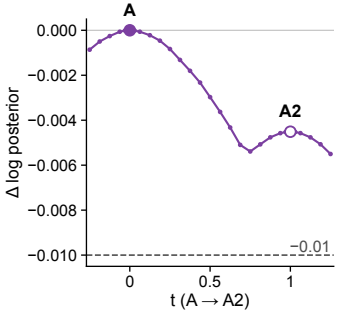

pick: eligible starts first, then the objective (fit_protocol 10a; PI, 2026-11-06)

picked: Mac Studio s4; reruns DGX Spark s1 and MCP s4; all in mode A; verdict by predictions only (PI, 2026-11-06)

c A flat direction

d Along the path A→A2

e Predictions at every start
